**Business Excellence in Concrete
with Sika[®]**

Business Excellence in Concrete

We bring the Power of innovative Technologies

Innovative Technologies to the Benefit of our Customers

In a rapidly changing world the ability to bring innovations to the market quickly is a key to success. We focus on the ideas that provide the greatest value to our customers.

Fast Globalization of new Technologies

Through an efficient and regulated process, innovations and new ideas are made available quickly and at every local Sika subsidiary in more than 70 countries. Innovations from Sika can therefore quickly bring "added value" into your businesses worldwide.

Flexibility and Adaptation to different Conditions

Our network of Regional Technology Centres is designed to transfer our technology and innovations into new products locally. Each finished product must give the best performance and cost effectiveness in the different regions of the world, despite the extremely diverse environments and market requirements. You can therefore benefit from the advantages of Sika technologies and innovations, immediately and everywhere in your daily activities globally.

Sika® ViscoCrete® Technology: Unique Opportunities for Cement and Concrete

Sika® ViscoCrete® technology substantially improves the basic properties of cement and concrete. The positive impact on every cement-based mix is substantial and clearly, visible, particularly in workability, slump life, consistency and high early strength.

Sika® ViscoCrete® technology is now really challenging the world of cement and concrete, providing unique opportunities for you to optimize your production and improve your business.

We understand and support your Business

Experience and Market Leadership in Construction Chemicals

Since 1910 Sika has provided products and systems with a clear mission: to optimize the construction process. We can contribute significantly to improved performance, enhanced quality and reduced overall costs, in every construction project.

Proven Competence in Cement and Concrete

Cement and concrete are core competencies of Sika. From the production of cement to extensive ready-mix concrete operations; from site-batched concrete on large projects to precast concrete in factory conditions. We can solve technical problems, and bring improvements to your production processes. We can generate "added value" for your customers and create new opportunities for your business.

Specified Sika Solutions in major Construction Projects, worldwide

Sika specialists provide extensive support to project owners and engineers in the planning, design and specification phase. Sika products and systems are widely specified worldwide. They are used in tunnels, bridges, power plants, industrial facilities, logistics centres and housing projects – all types of concrete structure.

Welcome on every Construction Site, worldwide

More than 4000 Sika specialists visit the contractors on construction sites around the world every single day. We provide special solutions and products to improve their construction process, particularly concreting, throughout the whole range of global climatic conditions and operating environments.

Advanced Marketing Concepts

In our marketing activities we focus on technical innovations with the greatest benefit to our customers. We operate in the same technology, market and business environments as you do and can therefore give you the additional benefit of many potential synergies.

Process Optimization

Materials

- Extend the use of low-cost, readily available materials
- Preserve natural resources
- Minimize the overall cost of raw materials

Production

- Streamline production and increase output
- Save energy
- Reduce labour requirements

Logistics

- Simplify
- Reduce stock
- Increase stock rotation

Quality

- Simplify quality control
- Reduce quality variations and waste
- Reduce the risk of claims and their costs

Differentiation

- Upgrade your products
- Extend your services
- Provide "added value" for your customer

New Opportunities

- Move ahead of your competitors
- Enter new businesses
- Increase your profitability

Unique Advantages with Sika® ViscoCrete® Technology
